in a day or two his former de-
was restored. He conversed fre-
quently with the prisoners, the
editors and the turnkeys, remark-
ing on occasion to one of the latter that

was too long a period to give
and that in his country there
were allowed only three weeks
ence. He seemed to be dissat-
isfied with the length of time granted him to
write. Notwithstanding that he is told
there is no hope of pardon, he still
shows his innocence to all who question
him. Within the past few
days, he has at his own request,
been supplied with writing materials, but
he intends making of them has no
use. His health seems to be im-
proved. It is much better than when he
was in the prison in April last.

marked in jail that he is possessed of an inordinate appetite, and his meals are with greedy haste. His spirits are administered to him by the warden, Boody, Baldwin, and Fish, who constantly attend him, and with whom he is constantly engaged in prayer.

clear, put it over the fire and boil it till the water is half gone. Then add one pound of rosin, let it boil for two, pour off in long pans to make into bars. This makes a very good soap, and is cheaper than soft soap. The materials; as the soda is cheaper than potash.

The following receipt for making cheap candles, a correspondent has tried several times, and it is cracked up to be. I have not tried it, but it would have been worth trying. I had known it five years ago, but farmers have a surplus of stock

stirry grease, which can be made
candles at a trifling expense. I

—I will tell you a secret worth knowing. A thousand things not worth much have been patented and sold as a business.

—If you cut off the back of your chairs so that the back part of all be two inches lower than the front, it will greatly relieve the fatigue of sitting on your spine in much the same manner as the back of the

principal fatigue in sitting comes from sliding forward, and thus strains the ligaments and muscles in the neck. The expedient I have advocated to obviate this tendency, and, as I have said, add greatly to the comfort and ease of the sitting posture. The front edge of a chair should not be more than fifteen inches high, for the average man, nor more than fourteen for a woman. The average chair is about sixteen inches high for all, which is a result of slanting in the seat can be avoided.

BOTS IN HORSEIZ. Take 3 pints of milk, and one pint of molasses, and sugar, well mixed. About a quart after giving this to the horse, put in the same quantity of strong vinegar, two ounces of pulverized alum in a bowl. It was successfully tried by J. C. of Switzerland county, and here the bots eat the milk and molasses and food, and when the alum strikes they kill them, and it is a good remedy. I understand that a physician in New York, was putting live bots into milk, to find one that would kill them. He accidentally fell into some molasses, which was on the table. He got the bots, and they immediately died. It has a similar result, when
